

SPETZLER

NEURO PATTIES

Designed by renowned neurosurgeon, Dr. Robert Spetzler, and biomedical engineers, Spetzler Neuro Patties™ offer exceptional pliability, compliance and a singular design not found in existing neurosurgical absorbable materials.

The tapered shape conforms easily to the surgical site while contouring to most tapered-style brain spatulas. Extremely thin rayon in a single layer construction offers optimal visibility and a very high absorption rate. A unique variety of sizes suits all three of your neurosurgical needs.

Spetzler/OMT Tapered Neuro Patties are available in the following configurations; please see diagram for individual pattie availability.

LABEL CODE AND COLOR	MATERIAL THICKNESS	RADIO-OPAQUE MARKER
K Purple	0.35 mm	Horizontal
V Green	0.35 mm	Vertical
L Blue	0.45 mm	Vertical
T Orange	1.40 mm	Horizontal

35 Sizes for all Neurosurgical Applications

Patties are shown actual size.
